# HOW TO USE YOUR HOGPLAY BYPASS

## **Activate the CarPlay system on motorcycle**

Pair your HogPlay Bypass as a headset with the motorcycle before attempting to start your OEM CarPlay system or HogPlay Media Box.

1. Plug Hogplay Bypass into heated accessory port under the seat on you bike.
2. On the bike, press the menu button go up to settings device. Settings >Device Manager >Add New Device > Searching "HogPlay Bypass.' >Verify and **make sure pick rider role**. CarPlay icon should illuminate.
3. On your iPhone > Settings > Bluetooth > add the bike to allow for any prompts.
4. On your Phone > Settings > Wifi > must be turned on for Wireless Carplay Function.

## **Setup Notes:**

1. It won't work if it's set as passenger. Select **RIDER ROLE or PRIMARY**.
2. Check your Skyline OS version, possibly pull the main fuse on the bike to reset the infotainment system and attempt to reset the system. Then start again.

## **Reset your Motorcycle Connection:**

1. Deleting your iPhone from the Motorcycle in Device Manager
2. On your phone - Settings - Bluetooth - Delete the HD-Ride####
3. On your phone - Settings - General -CarPlay - Delete the HD-Ride connection
4. On your phone - Settings -Bluetooth - add the bike, allow for any prompts.
5. Your phone should prompt to enable wireless CarPlay and then start CarPlay.
6. You may have to re-enable Carplay connection on your phone.

## **Using OEM USB Connection while using HogPlay Under Seat Bypass:**

Use OEM port normally to charge your device, connect to wired Carplay or a HogPlay Media Box. Doesn't not rely on the OEM USB connection.

## **Note:**

Some riders are already using their heated accessory ports for Factory heated seats or jackets. The HogPlay Under Seat Bypass can be connected using a HogPlay Under Seat Splitter or T. Alternatively we also have a 12pin version that connects to an open accessory port also under the seat. Contact us for details.

## **Warranty:**

HogPlay Under Seat Bypass has a 90 day warranty for Parts & Labor Defects. Warranty can be extended to 12mths by registering your device on our website.

## **Product Registration:**

## **Tech Support:**

[support@HogPlay.com](mailto:support@HogPlay.com)

\*Please note, if there are issues with the OEM Carplay, Bluetooth or Wireless functions you will have intermittent connectivity issues. We recommend updating your system to the latest firmware or getting your OEM connections repaired.

**All HogPlay Bypass & Media Box systems are tested before shipment to ensure it works flawlessly and is ready to use right out of the box.**
