HOW TO USE YOUR HOGPLAY BYPASS

Activate the CarPlay system on motorcycle

Pair your HogPlay Bypass as a headset with the motorcycle before attempting to start your OEM CarPlay system or HogPlay Media Box.

1. Plug the BYPASS into the USB-c port on you bike.
2. On the bike, press the menu button go up to settings device. Settings >Device Manager >Add New Device > Searching "HogPlay Bypass.' >Verify and **make sure pick rider role**, CarPlay icon should illuminate.
3. On your Phone > Settings > Bluetooth > add the bike to allow for any prompts.
4. On your Phone > Settings > Wifi > must be turned on for Wireless Carplay Function.

Setup Notes:

1. It won't work if it's set as passenger. Select **RIDER ROLE or PRIMARY**.
2. Check your Skyline OS version, possibly pull the main fuse on the bike to reset the infotainment system and attempt to reset the system. Then start again.

Reset your Motorcycle Connection:

1. Deleting your iPhone from the Motorcycle in Device Manager
2. On your phone - Settings - Bluetooth - Delete the HD-Ride###
3. On your phone - Settings - General -CarPlay - Delete the HD-Ride connection 4. On your phone - Settings -Bluetooth - add the bike, allow for any prompts.
5. Your phone should prompt to enable wireless CarPlay and then start CarPlay. 6. You may have to re-enable Carplay connection on your phone.

Charging your phone with HogPlay USB-C Bypass

The passthrough USB-C female allows for wired Carplay, charging or HogPlay Media Box. Most OEM ports do not support high speed charging.

Note:

You can use this port for a wired data connection. We recommend using only HogPlay Premium USB Cables. These have been tested to ensure stable connection w/out issues. Occasionally Flipping your Cable will resolve issues.

Warranty:

HogPlay USB-C Bypass has a 90 day warranty against Parts & Labor Defects. Warranty can be extended to 12mths by registering your device on our website.

Product Registration:

Tech Support:

support@hogplay.com

*Please note, if there are issues with the OEM USB power port this device will have connectivity issues. The OEM USB connection must be repaired for stable use. OEM Wired Carplay, Bluetooth and wireless all must be fully functional.

All HogPlay Bypass & Media Box systems are tested before shipment to ensure it works flawlessly and is ready to use right out of the box.
